

That the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our time at home giving us back some of our privacy. Before the law, every night and even on weekends (including Sunday) we used to receive 4 or 5 calls a day, now I only receive one. Now we rarely receive a call. Please do not delute the law. (or give us your number so we can pass it along to the telemarketers!
